

Clearwave Corporation Launches New Corporate Website to Showcase New Healthcare Solutions

ATLANTA – October 22, 2010 - Clearwave Corporation announces the launch of a new corporate website (www.clearwaveinc.com) to showcase the Clearwave Patient Information Exchange software, kiosk and service-based solutions.

The software, kiosk and service-based solutions are designed to standardize and automate administrative and patient-facing services that providers manage to serve patients, comply with federal/state regulations and maximize revenue cycles. By aligning a healthcare organization's existing systems, Clearwave enables healthcare providers to communicate and gather patient information more effectively.

"From the beginning, Clearwave has focused on improving a healthcare organization's revenue by managing patient information to perform real-time eligibility verification before services are rendered while sharing this data with existing back-end information systems," said Gerard White, CEO for Clearwave. "Through our experience and industry knowledge, Clearwave is moving towards a single patient identifier and the electronic exchange of personal health records. This is where the industry is headed and Clearwave is a front-runner."

Through various points of reference (at check-in through a Clearwave kiosk, through the integration with a provider's PMS or HIS system and a proprietary system), Clearwave receives patient data and cross references it to create a single identifier for a patient to ensure that the most accurate and up-to-date patient data is used when verifying plan benefits and submitting claims. Once the patient's identity is authenticated, Clearwave then securely shares the patient data through its network that connects disparate healthcare entities and back-end systems to help keep the entities in synch while also enhancing the continuity of care.

Clearwave's Patient Information Exchange software is the epicenter of a larger and more comprehensive portfolio of solution modules that enhances an organization's existing systems while improving current processes without major disruption. Clearwave allows healthcare organizations to share patient data, lower healthcare administration costs, comply with federal and state regulations and improve the patient experience.

About Clearwave Corporation

Clearwave is headquartered in Atlanta, GA. The company is a premier network provider in patient information exchange. Clearwave's Patient Information Exchange software integrates with healthcare provider's existing systems and processes to verify patient demographics, insurance and payment information resulting in improved cash flow and administrative processes while enhancing the patient experience.
