Baptist Health Implements Self-Service Patient Registration Solution

Atlanta, GA – January 7th, 2014 – Baptist Health, a three-hospital faith-based system serving Central Alabama, today announced the implementation of a self-service patient registration system. The new system reduces patient wait times, enhances patient care continuity and provides doctors the most accurate patient information. Baptist Health’s implementation of self-service check-in kiosks has reduced patient check-in time from an average of 15 minutes to 3 minutes.

“We value our patients’ time and wanted to eliminate the traditional registration process which included a clipboard and long forms. The Clearwave system gives our patients access to the latest registration technology, and patients love the ease of use,” said Katrina Belt, Senior Vice President and Chief Financial Officer of Baptist Health. “Patients can use this solution at Montgomery Cancer Center, Carmichael Imaging, Montgomery Breast Center, Baptist Breast Health Center, Prattville Baptist Hospital, Prattville Imaging Center, Baptist Health Physician Group, and Baptist Medical Center South, including in the Emergency Department. Our goal is to have the same convenient patient registration process across all our facilities.”

From the patient standpoint, the registration process is streamlined to allow patients to verify their own information at the kiosk. Patients quickly and easily update information as needed without having to deal with paper forms or wait in lines. From a staff perspective, there is visibility over the check-in process so the team knows immediately when a patient arrives. The overall impact is to reduce patient wait times and streamline patient registration.
