

Job Title: Lead Mobile Application Engineer
Department: Development
Revision Date: 10/18/2018

### **Company Overview**

Clearwave Corporation is a rapidly-growing healthcare software company based in Dunwoody, Georgia. We improve the patient experience by making the check-in process fast, simple, and seamless. We allow patients to check in on their mobile devices or via registration kiosks. We eliminate paperwork, automate eligibility verification, reduce check-in times by 70%, and increase cash collections by over 50%. We value excellent customer service, honesty, respect, flexibility and cooperation. Our team works diligently to deliver results and provide fresh solutions to solve customer pain points.

### **Position Overview**

Software engineer with 5+ years of mobile application development experience. The Lead Mobile Application Developer will be responsible for all aspects of Mobile platform, including the API layer, user interface development, code quality, and the technical direction of collaborating engineers.

Candidates also need to have expert knowledge of .NET development and bring a background in hands-on programming to assist with new and maintenance projects. We are a full-stack development shop that requires all developers to be involved in each level of our applications.

### **Responsibilities & Duties**

- Responsible for all major components of the mobile application and it's interaction with the database.
- iOS and Android application design and development using Xamarin.
- Assist in the creation and maintenance of the .Net API and business layer applications that facilitate the native mobile application.
- Diagnose and Resolve production problems around the native app and API.
- Analyze complex requirements and information to provide estimates and ROMS (rough order of magnitude), while ensuring viability and appropriateness for defined scope of work.
- Work independently or with the team to design or participate in the development of unit, integration, functional, and performance tests.
- Create/update Clearwave's application documentation.
- Stay current with changes in the technical area of expertise.
- Work with development teams to deploy code in production when needed.
- Provides feedback, training and other employee development activities.
- Demonstrate strong interpersonal skills with a collaborative style, including the ability to develop creative approaches to tasks and challenges given.

### Knowledge, Skills & Abilities

- BS or BA in computer science or management or equivalent
- 5+ years' experience developing native apps for iOS and Android
- 5+ years' experience with C# / .NET Framework or Java
- 3-5 years' experience in Microsoft Windows Technologies (IIS/Windows Server)
- Experience with Visual Studio Tools for Xamarin, HTML, and ASP.NET
- Experience with SQL Server/T-SQL or other Relational Database Management Systems (Oracle/MySQL)
- Experience with source control management via Git or TFS
- Experience with JavaScript or other client-side frameworks strongly desired
- Experience with validating and deploying mobile apps for hosting on Play Store/App Store
- Proven experience in delivering high quality and well architected software projects
- Experience in agile methodology strongly desired
- Expected to multi-task and accommodate change of priorities on demand
- Experience with cloud-based application infrastructure (Azure or AWS) is a plus

### Position Details & Benefits

- Full-time, salaried position
- Health Benefits offered (medical, vision, life and disability insurance)
- 401(k) with Company match
- Bonus opportunity
- Flexible work schedule with one day per week Remote
- Paid Personal Time Off (including six holidays per year)
