

Job Title: Associate Software Engineer - Mobile
Department: Operations
Revision Date: 1/17/19

### **Position Overview**

An Associate Software Engineer is an entry level software development position at Clearwave Corporation. Associate Software Engineers begin their development career at Clearwave by assisting the Development and QA teams in creating automated tests using C#. This position will entail work primarily on the UI and back end of our native mobile application for iOS and Android devices. In this role, you will learn our suite of products and gain the experience needed to become a productive member of the development team. Our software is utilized by some of the nation's most respected hospitals and physician-owned practices. We are looking for bright-minded and innovative individuals with a passion for creating a quality product and thinking outside of the box!

Clearwave Corporation is a fast growing, innovative healthcare technology company working to improve healthcare for patients & providers through creative technology and processes. Our product has an immediate and wide-ranging impact on the efficiency of the patient registration process as well as the revenue cycle. We eliminate paperwork, automate eligibility verification, reduce check-in times, and increase cash collections. You will enjoy a flexible work schedule, including working from home 1 day per week. We have an excellent benefits package. Come join a talented team of people that enjoy our work and each other.

### **Essential Job Functions**

- Create and maintain UI tests using Xamarin UI Test for mobile devices using iOS and Android using C#
- Create and maintain tests for backend logic including but not limited to Clearwave's internal API using C#
- Become an expert on our products and features
- Work closely with Mobile Development and Quality Assurance associates to understand the current code base and identify, design and create test suites/test cases for diverse projects to ensure all functional requirements are met
- Contribute to the development of and maintenance of manual and/or automated testing framework that facilitates functional testing, regression testing, and load/performance testing
- Partake monthly in maintenance releases or special releases as scheduled
- Work directly with our development and design team to provide input on functionality, product design, and product usability for Clearwave's native mobile application
- Review any failed tests with developers and assist them in pushing new code to staging environments
- Ability to implement software quality best practices throughout the development life-cycle

- Maintain testing documentation and results of automated tests
- Attend Daily SCRUM
- Work on special projects as required

### Requirements

- At least 1+ years' experience using C# in a professional capacity
- Proficiency in SQL and Visual Studio
- Experience with any Xamarin product including Xamarin UI Test preferred
- GitHub, TeamCity and Postman experience preferred
- Enjoy processes and possess strong organizational skills
- Detail-oriented and able to research issues to bring them to closure
- Ability to work with minimum direction and to work effectively in a team environment or across multiple teams
- Take full ownership of key projects
- Proven strong communication skills and the ability to work with people from diverse backgrounds and experience
- Experience in agile methodology strongly desired
- Candidates with HTML and JavaScript proficiency may have the opportunity to work in other areas of our applications depending on experience and interest
- Jira or any Atlassian knowledge is a plus
- Any experience using Selenium or any other automation frameworks a plus

### Position Details & Benefits

- Full-time, salaried position
- Health Benefits offered (medical, vision, life and disability insurance)
- 401(k) with Company match
- Bonus opportunity
- Flexible work schedule with one day per week Remote
- Paid Personal Time Off (including six holidays per year)
