

Job Title: Mobile Applications Engineer
Department: Development
Revision Date: 1/11/2019

Company Overview

Clearwave Corporation is a rapidly-growing healthcare software company based in Dunwoody, Georgia. We improve the patient experience by making the check-in process fast, simple, and seamless. We allow patients to check in on their mobile devices or via registration kiosks. We eliminate paperwork, automate eligibility verification, reduce check-in times by 70%, and increase cash collections by over 50%. We value excellent customer service, honesty, respect, flexibility and cooperation. Our team works diligently to deliver results and provide fresh solutions to solve customer pain points.

Position Overview

Software engineer with 2+ years of mobile application development experience. The Mobile Applications Engineer will be working within all aspects of Mobile platform, including the API layer, and user interface development. Candidates also need to have knowledge of .NET development and bring a background in hands-on programming to assist with new and maintenance projects. We are a full-stack development shop that requires all developers to be involved in each level of our applications.

Essential Job Functions

- Works within the software development and QA teams to deliver timely, high quality software products consistent with our product roadmap.
- iOS and/or Android application design and development using Xamarin.
- Assist in the maintenance of the .Net API and business layer applications that facilitate the native mobile application.
- Diagnose and Resolve production problems around the native app and API.
- Follows established processes and makes use of departmental software development tools.
- Write and execute unit tests of all code created.
- Create/update Clearwave's application documentation.
- Partake in bi-weekly maintenance releases or special releases as scheduled.
- Work directly with our development and design team to provide input on functionality, product design, and product usability.
- Ability to implement software quality best practices throughout the development life-cycle.
- Demonstrate strong interpersonal skills with a collaborative style, including the ability to develop creative approaches to tasks and challenges given.

Requirements

- BS or BA in computer science or management or equivalent.
- 2+ years' software development.
- Proven programming background and hands on programming experience.
- Proven experience in delivering software projects.
- Experience with C#, Visual Studio Tools for Xamarin, Java, HTML, and ASP.NET.
- Experience with SQL an understanding of Object-Oriented programming methods.
- Proficiency in .NET Framework: C#, HTML, CSS, JavaScript, Visual Studio, SQL, WebAPI, Web Services, Multi-threading, Asynchronous coding, WebForms, WinForms, MVC, nHibernate, jQuery, Entity Framework, multi-tier architecture.
- Experience with any of the following is preferred but not necessary: Knowledge of XML and HL7 integrations, knowledge of practice management systems in the Healthcare IT field, any API experience, basic health care insurance benefits.
- Jira or any Atlassian knowledge is a plus.
- Experience in agile methodology strongly desired.
- Expected to multi-task and accommodate change of priorities on demand.
- Collaborate and work across multiple teams.
- Take full ownership of key projects.

Position Details & Benefits

- Full-time, salaried position
- Health Benefits offered (medical, vision, life and disability insurance)
- 401(k) with Company match
- Bonus opportunity
- Flexible work schedule with one day per week Remote
- Paid Personal Time Off (including six holidays per year)
